### DETAILED ACTION

1. Claims 1-32 are in the case.

2. *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, 32 drawn to process of making formula IA or IB employing known microorganism selected from genus of stempylium, glocolacdiuim.....etc., classified in class various, subclass various, depending on the election of species of microorganism and how the process is conducted i.e. including cryopreservation or liquid culture induction. If this group is elected, a further election of a single disclosed species of microorganism and the processing steps including production, purification and continuous processing of the process is also required.
- II. Claims 24-31, drawn to process of making formula IA or IB employing *Cunninghamella bainieria*, classified in class various, subclass various, depending on classification and operability of the keep reagent *Cunninghamella bainieria* and how the process is conducted.

The inventions are distinct, each from the other because:

Group I and Group II employed patentably independent and distinct material for making the product by independent and distinct steps. No relationship can be identified that a process employing known microorganism such as stempylium, glocolacdiuim.....etc. is *related* to the micro-organism *Cunninghamella bainieria*, i.e. unrelated processes.

Should applicant traverse on the ground that the groups/species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the groups/species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention. In the

Art Unit: 1625

instant case, then there could have been no patentability of all the claims since claims 1-23 are statutory double patenting over US 6,613,907.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Celia Chang whose telephone number is 571-272-0679. The examiner can normally be reached on Monday through Thursday from 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang, can be reached on 571-272-0562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
